Professional Summary

Software Engineer with 2+ years of experience in distributed systems and production engineering. Experienced in building and deploying Generative AI applications using LangChain, LangGraph, RAG, vector databases, and multi-agent architectures. Skilled in Python, FastAPI, Docker, and AWS, with a focus on scalable AI and LLM-powered systems.

Technical Skills

Programming Languages: Python, JavaScript, SQL, C++

Generative AI: LangChain, LangGraph, LlamaIndex (Basic), Retrieval-Augmented Generation (RAG), AI Agents, Multi-Agent Systems, Embeddings, Prompt Engineering, Semantic Search, Context Management, Tool Calling, Structured Outputs, LLM Evaluation

LLM Ecosystem: Gemini, Groq, Cerebras, HuggingFace Embeddings, Pydantic

Vector Databases: ChromaDB

Backend: FastAPI, REST APIs

Data Analysis: Pandas, NumPy, Matplotlib

Distributed Systems: Solace PubSub+, Event-Driven Architecture

Cloud DevOps: AWS EC2, Docker, Docker Hub, Jenkins, CI/CD

Monitoring: Splunk, AppDynamics

Tools: Git, GitHub, Linux, IntelliJ IDEA, SecureCRT

Projects

Multi-Agent AI Trading Research Agent

Python, LangGraph, LangChain, ChromaDB, HuggingFace Embeddings, FastAPI, Docker, AWS EC2, Tavily Search, Gemini, Groq

- Designed and developed a multi-agent AI system for market research and trading intelligence.
- Implemented Retriever, News, Sentiment, Risk Analysis, Summary, and Memory agents using LangGraph.
- Built a Retrieval-Augmented Generation (RAG) pipeline using ChromaDB and HuggingFace embeddings for semantic retrieval.
- Integrated Tavily Search and market data tools to provide real-time market insights and analysis.
- Developed memory persistence and contextual retrieval workflows enabling intelligent conversation history management.
- Containerized the application using Docker and deployed it on AWS EC2 through FastAPI.

HireSense AI – LLM-Based Resume Intelligence Engine

Python, OpenAI API, LangChain, FastAPI, Embeddings, Streamlit

- Developed an LLM-powered platform for semantic resume-job matching and candidate evaluation.
- Implemented embedding-based similarity search to improve matching accuracy and recommendation quality.
- Built AI-driven resume analysis and feedback generation workflows using OpenAI models.
- Designed a modular architecture integrating frontend, backend, and AI processing components.
- Optimized application performance through embedding reuse and response caching strategies.

Image2Insight – OCR-Based Sentiment Analysis

Python, OCR, NLP, VADER Sentiment Analysis

- Built an OCR and NLP pipeline to extract and analyze text from image-based documents.
- Applied image preprocessing techniques to improve text extraction quality and OCR accuracy.
- Implemented sentiment classification using VADER sentiment analysis.
- Automated text extraction, preprocessing, and sentiment scoring workflows.

Professional Experience

LTIMindtree

Jun 2024 – Present

Software Engineer – Platform Engineering Distributed Systems

- Managed enterprise-scale event-driven messaging systems using Solace PubSub+.
- Maintained distributed messaging infrastructure comprising 40+ brokers across global environments.
- Performed root-cause analysis and resolved production incidents to improve platform reliability.
- Implemented monitoring and observability solutions using Splunk and AppDynamics.
- Automated operational workflows including certificate management and VPN onboarding.
- Supported CI/CD deployment and release processes across multiple environments.
- Utilized SQL-based analysis and performance metrics to identify system bottlenecks.

LTIMindtree

Feb 2023 – Apr 2023

Cloud Engineer Intern

- Assisted in provisioning cloud infrastructure using AWS services.
- Supported Kubernetes-based deployment and environment management activities.
- Participated in cloud platform operations and deployment automation.

Leadership Communication

- Developed strong public speaking and presentation skills through regular audience-facing speaking engagements.
- Strengthened leadership, mentoring, and stakeholder communication abilities by coordinating learning and engagement initiatives.
- Enhanced active listening, constructive feedback, and collaboration skills through structured evaluation and feedback programs.
- Facilitated discussions and knowledge-sharing sessions in professional and team-oriented environments.

Education

Global Academy of Technology

Bachelor of Engineering (Electronics and Communication Engineering)

2019 – 2023
